Subject: Hose Testing

The majority of hose testing is complete – The cities firefighters have done an outstanding job with this endeavor this year in such a short time span. Mike and I will be able to finish the few remaining sections on our own. We have not reduced any of the apparatus hose inventory but, have found a great deal of hose to be out of service. We have replaced all of the bad sections of hose from the apparatus with the spare hose on hand. I will have a complete hose report ready for you and the Mayor next week.

I am going ahead to begin a Firefighter Assistance Grant application for new fire hose and nozzles. I believe this is our greatest liability at the present time. The grant specifies that it will not replace equipment less than 15 years old – prior to testing today our average hose age was 19 years.

Subject: Update on Hose Testing

Over the past two weeks we have tested 4,465 feet of fire hose. Of that, 650 feet have been taken out of service from a variety of reasons: age of hose (not compatible with current standards), hose lining failures and hose with leaks. I intend to have all hose testing completed by the end of the year.

Subject: Hose Testing

We had a great start today. Three of us tested 2,400' (48 sections of 50' hose). Out of that, we had 6 – 50' sections which we found to be damaged beyond repair. We will continue to test until all hose has been tested. With the limited help and our schedules, we hope to have all testing complete by the end of the year. I have spoken with ISO and we were scheduled for an inspection next year. I asked if it could be put off until 2015 and they said that should not be a problem. With that time frame, I believe we should be able to reduce our ISO rating from a 4 to a 3 (possibly a 2) with some minor improvements.
