Construction to Begin on Traffic Signal at Countryside Blvd & Highway 75

Construction on the new traffic signal at Countryside Blvd and Highway 75 is scheduled to begin on Monday, August 18. The Contractor performing the work is Power Plus, Inc from Boise. The construction period is estimated to take until September 29 with possible follow-up work in October. This construction is a result of an agreement with the Sweetwater Development adjacent to Countryside Blvd.

Periodically during the construction period traffic will be rerouted through the area into single lanes in each direction. Drivers are urged to use caution during construction. The City of Hailey and ITD have been working together to bring this project forward. Any questions concerning the construction can be directed to the City of Hailey Public Works Director, Tom Hellen, at 788-9830, Ext 14.
