CITY ANNOUNCES PLOWING PRIORITY FOR PREDICTED MAJOR STORM

(Hailey, Idaho) – With the recent snow events and with the current forecast for up to 2 feet of new snow by 5:00 p.m. on Christmas day, the City of Hailey Public Works Department asks citizens to limit their travel as much as possible.

Snowfalls of this size take an enormous amount of time to clear in order to maintain accessibility to city streets, which may translate into difficult or hazardous driving conditions throughout the city.

The Street Department will plow Main Street and Main Street intersections during this coming snow event. Every effort will be made to plow the side streets; however, the priority will be to concentrate on the main arterials and emergency facilities.

Please call 788-9830 x 14 with questions about snow removal.
