Notes to Bulk Requirements:

<sup>1</sup> Must be accessory to the primary use and contained within the walls of the primary structure.

<sup>2</sup> Indicates use may be allowed where State or Federal law preempts local zoning.

<sup>3</sup> The setback from the adjacent property shall be one (1) foot for every two (2) feet of building height for all portions of the building exceeding 20 feet in height, provided, however, no side or rear yard shall be less than ten (10) feet. See the figure located at 4.2.5 for more explanation.

<sup>4</sup> Riparian Setback. Unless otherwise provided for herein, all permanent buildings and structures shall have a one hundred foot (100') wide Riparian Setback from the mean high water mark of the Big Wood River. Removal of live vegetation or excavation within the Riparian Setback is prohibited, except for any tree that has been recommended for removal by a certified arborist, in writing, because the tree has been found to potentially endanger the resident(s) of the property on which it is located or any member of the public, or has become hazardous to any street, alley or other public right-of-way or public utility, or because the removal of a tree would substantially improve the health of other trees on the property. Pruning of trees and planting of riparian trees, shrubs and ground cover within the Riparian Setback are allowed, provided however, that all plantings conform to the criteria for evaluation in Section 4.10.7.2(k) of this Ordinance. Where the application of the one hundred foot (100') Riparian Setback and other applicable setbacks will result in a building site of one thousand (1000) square feet or less, the Riparian Setback may be reduced to such an extent that the building site is one thousand (1000) square feet; provided however, the Riparian Setback shall not be less than fifty feet (50').

<sup>5</sup> In GR, TN zones, townhouse sub-lots shall have an aggregate density of no more than ten (10) lots per acre.

<sup>6</sup> Townhouse sub-lots shall conform to the standards established in the IFC

<sup>7</sup> Town house Unit shall be allowed zero setbacks from the lot lines created by a Townhouse Sub-Lot and the separation of the building containing Townhouse Units in a Townhouse Development parcel shall be not less than six (6) feet as measured between any wall or any projection of a building, including but not limited to eaves, cornices, canopies, or other similar roof overhang features, pergolas, chimney chases, bay windows, decks, steps, wainscot, and utility meters; or the minimum distance required by the IBC and IFC, whichever is greater.

<sup>8</sup> In NB zone, townhouse sub-lots shall have an aggregate density of no more than fifteen (15) lots per acre.

<sup>9</sup> In LB, B zones, townhouse sub-lots shall have an aggregate density of no more than twenty (20) lots per acre.

<sup>10</sup> In TN zone, 40% lot coverage will be allowed where at least 75% of required parking spaces are enclosed within a structure.

<sup>11</sup> In LI and TI zones, the side and rear yard setbacks shall be twenty five (25) feet where the subject property is located adjacent to the following zones: RGB, GR, or TN

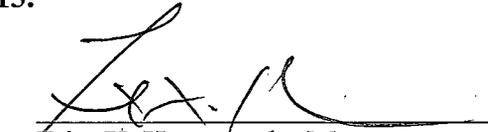

<sup>12</sup> Subject to FAA regulations and 14 CFR, Chapter 1, Subchapter E, Part 77, Objects Affecting Navigable Airspace, as amended.

**Section 14.** Should any section or provision of this Ordinance be declared by the courts to be unconstitutional or invalid, such decision shall not affect the validity of the Ordinance as a whole or any part thereof other than the part so declared to be unconstitutional or invalid.
