

NEWS RELEASE 11/19/2013
ANIMAL POISONING

Update on the animal poisoning in the Della View area of Hailey. At this time the police have determined that meat was placed in a vacant drive way in Hailey, and this is where the three affected dogs ate from. It is unknown at this time whether a poisonous substance was added to this meat or not. Hailey Police have collected a sample from the driveway and have sent this to the Idaho State Police Crime Lab. All three affected dogs have recovered and there have been no other reports of dogs getting sick in the area. We have talked to the individual who placed the meat in the driveway and do not believe there are any current threats to animals at this time. The investigation is ongoing and dependent on the lab results.
