

Water Smarty Rebate Program Has Funds, Plans Winter Workshop

This year's lawn replacement projects are wrapping up, but funds are still available for rebate projects in 2018. The project shown below removed nearly 2,000 square feet of lawn and replaced it with hardscape, fruit trees and drought tolerant plants. The project received a \$2,000 rebate from Water Smarty.

To participate in the program, you must file a pre-application to reserve rebate funds. You can review the Water Smarty program guide on the City's website or call 788-9830 x20 for more information.

Rebate applicants must attend a water-wise workshop. A free workshop is planned for this winter, likely sometime in January. This will give participants time to plan their projects before spring. Watch the City's website for the exact date of the workshop.

WATER LESS. SAVE MONEY. BE A WATER SMARTY.
