## **Hailey Releases Flood Preparation Information**

### **Flood Watch Advisory Issued During Flood Awareness Week**

(Hailey, Idaho) – With rain in the forecast, the National Weather Service office in Pocatello issued a flood watch to areas within Blaine County for the period March 22-24, 2019. The City of Hailey is flanked on the east by snow-covered hills and fields, which produced intense flooding a year ago during a rain on snow event. City officials advised residents to be prepared for such an event, giving them information and policies by which to be prepared.

Concurrently with the Flood Watch is Flood Awareness Week. The City of Hailey issued its information and policies pertaining to flood preparation to its residents this week, distributing the attached flyer at the Hailey Town Hall meeting and making it available on the city's website and Facebook pages.
