MYRTLE STREET PATH DESIGN WORKSHOP APRIL 24, 2018

Public Input Sought on Pathways for People Project

(Hailey, Idaho) – The City of Hailey’s Pathways for People levy will construct a separated, shared use path along the north side of Myrtle Street in east Hailey, connecting the Wood River Trails Bike Path to Main Street. The project is now under design and will be constructed in 2019.

Last week, the City of Hailey entered into a contract with Galena Engineering to design the project. The first step in this work is to seek public input for the design. A public workshop for that purpose is scheduled for Tuesday, April 24, 2018 at Hailey City Hall at 6:00 p.m.

During the workshop, engineers and city staff will be present to show diagrams of a conceptual path layout on an aerial photograph, highlighting some key components and areas of the projects, such as a retaining wall area on the Myrtle Street slope between Fourth and Third Avenues, the area from Main Street to the first alley where the pathway will serve the business area including Subway and Base Camp, the Main Street pedestrian crossing, and a typical section of the path alignment, including roadside drainage and landscaping.

Within an informal workshop setting, engineers and city staff will present an overview of the project to be delivered to the entire group, with break-out groups taking comments at large whiteboards depicting areas of the project.

The public is invited to share their ideas to enable the City of Hailey to design the best project possible for our community needs, including the needs of business, residents, and students walking or biking to and from the Wood River Middle School.
