AGENDA ITEM SUMMARY

DATE: April 11, 2011 DEPARTMENT: Finance DEPT. HEAD SIGNATURE: HD

SUBJECT: Reimbursement request from the Building Material Thrift Store

AUTHORITY: ☐ ID Code _______ ☐ IAR _______ ☐ City Ordinance/Code _______ (IF APPLICABLE)

BACKGROUND/SUMMARY OF ALTERNATIVES CONSIDERED:
The Building Material Thrift Store (BMTS) is a sub-awardee of the Hailey Community Climate Challenge grant. The sub-award includes funds for the purchase of a forklift and scaffolding to enhance deconstruction and material salvage operations at the BMTS. Because the funds for this grant are distributed by reimbursement, the BMTS has paid for the equipment in advance and has requested reimbursement. Once the city reimburses the BMTS, the EPA will reimburse Hailey for these spent grant funds.

The payment to the BMTS is in addition to the rest of the checks issued for payment. Due to timing, this payment was not included with the other checks and therefore requires a separate approval. The amount spent is $22,500.00 and does not exceed the amount listed in the Hailey Community Climate Challenge budget for this purpose.

AGENDA ITEM SUMMARY

DATE: April 11, 2011 DEPARTMENT: Finance DEPT. HEAD SIGNATURE:

SUBJECT: Letter of Agreement for building commissioning services at the Interpretive Center.

AUTHORITY: □ ID Code □ IAR □ City Ordinance/Code

BACKGROUND/ SUMMARY OF ALTERNATIVES CONSIDERED:
The Hailey Community Climate Challenge grant includes LEED Certification of the Interpretive Center. Building commissioning is part of LEED for New Construction Certification. Commissioning provides building owners with a third party engineer to provide checks and balances that the owner would not normally have with a classic design team. Often key elements of the design are obfuscated or less understood than the owner and general contractor realizes which often result in design deficiencies and compromises. These project risks can be eliminated with third party commissioning involvement. The commissioning authority makes sure that the Owner’s Project Requirements are reflected in the architects and engineers Basis of Design and that the actual selection and installment of systems by the general contractor and sub-contractors meet the Owner’s Project Requirements and Basis of Design.

The fee for this service is $2,400.00 and is not in excess of the amount listed in the Hailey Community Climate Challenge budget for this purpose.

Subject: *Hailey Community Climate Challenge* – building commissioning services at the Interpretive Center

Dear Brian:

You have been selected as the Commissioning (Cx) Authority for the Interpretive Center, to provide fundamental and enhanced building commissioning as part of the *Hailey Community Climate Challenge*. Please review the following conditions of the award, sign this letter and return the original to the City of Hailey for Mayor Rick Davis’ signature. I will then send you a complete, signed copy for your records.

1. The Cx activities, requirements, and systems to be commissioned are outlined in the attached request for quotes and proposal submitted by you.

2. Fundamental and Enhanced Commissioning Services, as required by USGBC’s LEED 2009 NC, will be provided for $2,400.

3. Includes commissioning of the HVAC, lighting, and domestic hot water system categories listed in the attached request for quotes; however, the details and specifications of the system components of such categories may be altered at anytime.

4. All commissioning activities described in the attached request for quotes and proposal submitted by you, will be conducted at the required times, determined by the timing of the design and construction activities. Timing of the design and construction activities will be determined by City of Hailey and architectural and engineering team. It is anticipated that the system design activities will commence immediately following April 11, 2011. The start and end date for construction activities have not been finalized.

Thank you very much for the thought and effort that have gone into your proposal for building commissioning services. The City of Hailey is grateful for your participation in the *Hailey Community Climate Challenge*, and I look forward to working with you on the Interpretive Center.

Sincerely,

Mariel Platt  
Sustainability Coordinator  
City of Hailey

Rick Davis, Mayor  Date  Brian Formusa P.E.  Date
Dear Commissioning Agent,

The City of Hailey is seeking price quotes for a building commissioning agent to provide fundamental commissioning and enhanced commissioning, on a new commercial building in Hailey, Idaho, that is seeking LEED certification.

ABOUT THE PROJECT: Hailey Community Climate Challenge (Challenge) is a Climate Showcase Community Grant Program made possible by a grant from the U.S. Environmental Protection Agency to the City of Hailey. One of the components of the Challenge involves obtaining LEED NC certification of the city's soon to be constructed Interpretive Center. The Interpretive Center is part of the Hailey Rodeo Park. In addition to the interpretive center, the Park will include a multi-use arena, an indoor ice rink, and a skate park (these facilities will not be obtaining LEED certification). The Interpretive Center will be used as a gallery space for historical displays and office and visitor space for the Hailey Chamber of Commerce and the City of Hailey. In addition, part of the Challenge includes the production of a film, which will document all project components of the Challenge, including the certification of the Interpretive Center.

The siting, schematic design, and elevations of the Interpretive Center have been finalized and approved. Please see the attached schematic floor plan. The construction documents have not been drafted. The square footage is approximately 2,000. The following is a brief description of the anticipated systems that must be included in the commissioning activities:

HVAC systems and associated controls
We anticipate that the 3 HVAC system to be comprised of indoor furnaces connected to exterior air cooled heat pumps. Ventilation and exhaust air will be provided by a Heat recovery ventilator.

Domestic hot water systems
Domestic hot water will be provided by electric hot water heater (potentially point of use instantaneous).

Lighting and daylighting controls
6.1 Controllability of Systems – Lighting:
   Interior lighting shall consist of a combination of ambient and task lighting; individual controls will be provided for occupants, via stepped-level dimming.

8.1 Daylight and Views – Daylight:
   Daylight sensors will be incorporated into daylit spaces, such that electric lighting load (ambient) will be automatically step-dimmed when daylight is sufficient for illumination requirements

REQUIREMENTS:

FUNDAMENTAL
Agent Qualifications and requirements:
1. Must have documented commissioning authority experience in at least 2 building projects.
2. Must report results, findings and recommendations directly to the City.
Commissioning Requirements:
1. Review the owner’s project requirements and the basis of design for clarity and completeness. Ensure that the basis of design reflects the owner’s project requirements, prior to the approval of contractor submittals of any commissioned equipment or systems.

2. Develop and implement a commissioning plan. The plan must include the following:
   a. Commissioning Program Overview
      i. Goals and objectives
      ii. General project information
      iii. Systems to be commissioned
   b. Commissioning Team
      i. Team members, roles, and responsibilities
      ii. Communication protocol, coordination, meetings, and management.
   c. Commissioning Process Activities
      i. Documenting the owner’s project requirements (document to be provided by the owner)
      ii. Preparing the basis of design (document to be provided by the design team)
      iii. Developing system functional test procedures
      iv. Verifying system performance
      v. Reporting deficiencies and the resolution process
      vi. Accepting the building systems

3. Develop and incorporate commissioning requirements into the construction documents
   a. The following project specifications (if applicable) will be used to inform contractors of their responsibilities in the commissioning process:
      i. Commissioning team involvement
      ii. Contractors’ responsibilities
      iii. Submittal review procedures for commissioned systems
      iv. Operations and maintenance documentation, system manuals
      v. Meetings
      vi. Construction verification procedures
      vii. Startup plan development and implementation
      viii. Functional performance testing
      ix. Acceptance and closeout.
      x. Training (enhanced only)
      xi. Warranty review site visit (enhanced only)

4. Verify the installation and performance of the systems to be commissioned.
   a. Installation inspections to ensure systems were installed properly.
   b. Performance testing, which includes testing to ensure system components are energized, programmed, balanced, and otherwise ready for operation under part and full-load conditions. Testing must include each process in the sequence of operations under central and packaged equipment control, including startup, shutdown, capacity modulation, emergency and failure modes, alarms, and interlocks to the equipment. This testing shall rely on testing procedures developed by the agent, listed in the commissioning specifications, and commissioning plan.
   c. At each point in the process of installation inspections and systems performance testing the agent should evaluate whether the installed system meets the criteria for the project as set forth by the owner’s project requirements and the basis of design documents.
   d. Discrepancies and deficiencies should be reported to the owner and the team should work collaboratively to find an appropriate resolution.

5. Complete a summary commissioning report, which includes the following:
   a. Executive summary of the process and the results of the commissioning program, including observations, conclusions, and any outstanding items.
   b. History of any system deficiencies identified and how they were resolved, including any outstanding issues or seasonal testing scheduled for a later date
   c. Systems performance test results and elevation
d. Confirmation form the agent indicating whether individual systems meet the owner’s project requirements, basis of design, and contract documents.

**ENHANCED (in addition to the fundamental commissioning requirements)**

Agent Qualifications and requirements:

1. Must have documented commissioning authority experience in at least 2 building projects.
2. Must report results, findings and recommendations directly to the City.

Commissioning Requirements:

1. Develop and implement a commission plan. In addition to what is listed above, under fundamental commissioning, the plan must also include the following:
   a. Documentation of the commissioning review process
   b. Reviewing contractor submittals
   c. Developing the systems manual
   d. Verifying the training of operations and personnel
   e. Reviewing building operation after final acceptance.

2. Conduct at least 1 commissioning design review of the owner’s project requirements, basis of design, and design documents prior to midconstruction documents phase and back-check the review comments in the subsequent design submission. The design review should focus on the following issues:
   f. Ensuring clarity, completeness, and adequacy of the owner’s project requirements.
   g. Verifying that all issues discussed in the owner’s project requirements are addressed adequately in the basis of design
   h. Reviewing design documents for achieving the owner’s project requirements and basis of design and coordination of commissioned systems.

3. Review contractor submittals applicable to the systems being commissioned and evaluate the following specifics:
   i. Conformance with the owner’s project requirements and basis of design. This review must be concurrent with the architect’s or engineers’ reviews and submitted to the design team and the owner.
   j. Fulfiling operation and maintenance requirements
   k. Facilitating performance testing

4. Develop a system manual that gives future operating staff the information needed to understand the optimally operate the commissioned system (this is in addition to the O&M manuals submitted by the contractors — the systems manual focuses on operating rather than maintaining the equipment). The following should be included, if applicable, in the system manual for each commissioned system:
   l. Final version of the basis of design
   m. System single-line diagrams
   n. As-built sequences of operations, control drawings, and original setpoints,
   o. Operating instructions for integrated building systems,
   p. Recommended schedule of maintenance requirements and frequency, if not already included in the project O&M manuals
   q. Recommended schedule for retesting of commissioned systems with blank test forms from the original commissioning plan.
   r. Recommended schedule for calibrating sensors and actuators.

5. Establish and document training expectations and needs with the owner. Provide the operations staff and occupants with training and orientation on the following applicable topics:
   s. General purpose of system
   t. Use of O&M manual
   u. Review of control drawings and schematics
   v. Start up adjustments and optimizing methods for energy conservation
   w. Health and safety issues
   x. Special maintenance and replacement sources
   y. Occupant interaction issues
   z. System response to different operating conditions
aa. Interactions with other systems.

6. Enter into contract with the city to review operations with staff and occupants, including a plan for resolution of outstanding commissioning-related issues 10 months after substantial completion.

7. Complete a summary commissioning report, which includes the following, in addition to the fundamental commissioning requirements:
   bb. Summary of the design review process
   cc. Summary of the submittal review process
   dd. Summary of the O&M documentation and training process

8. 10 months after substantial completion, review the building operation with O&M staff and occupants. All unresolved construction deficiencies as well as any deficiencies identified in this post occupancy review should be documented and corrected under manufacture or contractor warranties.

**PRICE QUOTE INFORMATION:** The City of Hailey seeks the following information in your price quote:

1. Pricing on all travel expenses, if applicable.
2. Two different price quotes 1) on fundamental and 2) on enhanced commissioning.
3. Indication of your availability – the development and completion of the construction documents will begin immediately. Construction will begin in July and is anticipated to be substantially complete in November or December.
4. Any other pricing information necessary to provide a complete price quote, inclusive of all costs.
5. Indication of level of involvement and anticipated roles of contractors and design team.
6. Indication that the agent can meet the requirement to provide documentation of commissioning authority experience on at least 2 building projects that are at least as complex as this project.
7. Information on the agent’s experience level working as a commissioning agent on a LEED project.
8. Any other information describing what is included in the price quote for the expected requirements of the commissioning activities (detailed above).

Please limit your price quotes and any supporting documents to no more than 3 pages. Price quotes may be sent via email to mariel.platt@haileycityhall.org.

Price quotes must be received by, **8am on March 31, 2011.**

Minority and women owned businesses are encouraged to respond.

Thank you,

Mariel Platt
Sustainability Coordinator
City of Hailey
(208) 788-9815 Ext. 24
Proposal: Hailey Rodeo Interpretive Center Commissioning

OBJECTIVE:
Provide commissioning (Cx) services in accord with the RFP requirements as emailed 3/24/11 including HVAC, lighting and DHW systems as outlined in the RFP. Particular emphasis is on verifying that these systems meet the targeted LEED requirements as reflected in both plan and specifications. Utilize ASHRAE CPMP Standards for commissioning, which I have employed since the first ASHRAE Standard '0' was in 2005 and carried through to current CPMP rollout. On the ground: strengthen ties between the installing contractor and Owner by commissioning the systems in tandem with the subcontractor. In my experience this allows the subcontractor to make onsite system adjustments in accord with project goals while maintaining a cooperative relationship with Cx authority. The ultimate objective is to employ a tactful, respectful expertise to move the project towards LEED goals, final completion and Owner acceptance.

SCOPE OF SERVICES AND METHODOLOGY

- Verify that the system is installed as per plan and specifications i.e. pipe and duct sizes, proper valve locations, insulation, lighting and domestic hot water (DHW) systems. Verify the installation and control of these systems is in accord with the spirit of the final LEED certification criteria including lighting controls, performance of DHW and HVAC systems without destructive testing.

- Ensure we have proper water and air flows, valve and damper settings, building air balance, heat pump operation, lighting control ramping, economizer operation, etc. Perform tests to ensure proper control operation under differing conditions (i.e. by simulating summer/winter conditions). Controls expertise is essential in Cx ~ 30 years as a controls designer will be employed even if advanced DDC controls are employed. Test and Balance (T&B) expertise is backed by that 30+ years of in-field expertise. Subcontractors will perform all T&B and control adjustments in order to maintain project warranties and ownership.

- Develop a collaborative interaction between the General Contractor, their subcontractors and City of Hailey to resolve any issues in a constructive win-win atmosphere.

- Assumptions: Each subcontractor shall perform their own start-up, test/balance/control adjustments and system verification procedures (to conform to plan and spec) before the commissioning procedure is begun. These reports will be reviewed – and audited with spot field tests by the Cx to verify reasonable accuracy of the reporting (a.k.a. third party verification). The Sub-contractors shall be on-site during each building system Cx process (Electrician, Plumber, HVAC subs) to provide on-site final adjustments during the Cx audit. This caveat protects the G.C. and Owner in that any deficiencies or punch-list items developed as part of the Cx process have subcontractor participation and buy-in for follow-up. Usually the system adjustments (always made by the installing contractor) can be made at this time to comply with Cx approval.

- Following the Cx audit above, a deficiencies list will be prepared for the project. Only one site visit for each system (HVAC, lighting, DHW) is envisioned in this proposal as it is a simple, small structure with very little complexity. In unusual circumstances where substantial system construction deficiencies persist, any follow-up verification can be made by the G.C. site superintendent or the City’s engineering staff (T. Hellen
or J. Zurubika are qualified.) The Cx authority is available at the City's behest to perform additional site supervision/verification on a time ($125/hr) and materials basis.

- Enhanced Cx services will include the above fundamental Cx tasks plus no more than 8 hours for Arch/Engr design meetings, plan review and any follow-up reports and correspondence. An extended Cx service may be enlisted at the Owners behest at normal billing rates.

QUALIFICATIONS AND EXPERIENCE

- Project Familiarity/Ownership: I have participated in the entire 3 hour LEED pre-design charrette for this project and well understand the LEED process and goals established. In addition I am privy to several critical programming goals that were not well explored at that time. In addition I expect to donate an additional 45 hours of time to the City on related Climate Challenge Grant work over the next 3 years. The project is one minute from my house, in short it is a community project that I continue to donate time to.

- Design/Construction Teaming: I have worked in a similar Owners' representative oversight capacity with ES² (Hugh), and have worked with Paul Stoops, RLB and nearly every HVAC, plumber and electrical subcontractor in town, with historically excellent rapport and end results.

- Cx Experience: Recent experience in commissioning services for the City of Hailey on two 2009-2011 projects; a 24.6 kW electrical PV system and an HVAC retrofit (project value $249,000). I am currently the Commissioning authority for the Blaine County School District regarding a $60 Million school bond, these are primarily HVAC, lighting and energy retrofit projects. I have performed Cx services for clients since 1981 well before "commissioning" developed into a named component of the building process.

- LEED: Review my Qualifications and Experience online at brianformusa.com. In particular the pre-LEED type projects as early as 1982 when I was awarded a National Energy Design Award for the most energy efficient commercial building in America in a juried AIA process. This project, "Ventura CoAstal" is a corporate headquarters for the 7-Up Corporation which was one of the first projects in the USA to include computer modeling for site location, landscaping, architectural daylighting design with electronic controls, energy efficient mechanical systems, economizers and annual energy modeling as a part of the design process (I authored the energy modeling software, daylighting design, some architectural design and complete HVAC design). This process was much more involved that either current LEED or Title 24 design procedures.

- LEED: This project is in concert with a very specific 30 year-long career track in energy efficient building and mechanical design, particularly as an early adopter of natural ventilation, daylighting, passive solar and active solar designs as early as 1980. I hold a B.S. degree from Cal Poly in one of the country's first accredited HVAC and alternative energy efficiency programs. More importantly I started as shop floor mechanical installer and "worked my way up" and then back down again to regain vital field experience as required. Today, I install as well as design systems. A member of ASHRAE since 1980, the only USA authority on Commissioning procedures.

- Performance Record: There has never been any litigation, error or omission claim on any project I have designed or managed, I attribute this to interpersonal and communication skills. Contact locals; Tom Hellen, Roger Parker, Howie Royal, Rick Stark, Tor Jensen or other on request for recent local Cx references.

- Travel Time and Expenses; fortunately, this is a neighborhood project for me. I am a 1 minute bike ride away from the project and there is no (0) travel time charged to travel to this jobsite for even the smallest verification, meeting or solution. I consider this project to be a community affair and am pleased to offer substantially discounted services to participate.
PROFESSIONAL Cx FEES

A. Fundamental Commissioning Services as outlined in the referenced RFP - $1400.
B. Enhanced Cx Commissioning Services as outlined in the referenced RFP - $2400.

BENEFITS

Enhanced Cx will provide the Owner with basically a third party engineer to provide checks and balances that the Owner would not normally have with a classic design team. Often key elements of the design are obfuscated or less understood than the Owner or G.C. realizes which often result in design deficiencies and compromises. These project risks can be eliminated with veteran third party Cx involvement. One client described it as “holding the design team accountable from the inside-out to meet design objectives”. Most engineers describe my process as not only cost effective but an enhancement to the design process. Ninety percent of the time these value-engineered ideas cover the extra cost of my fees and result in significant annual energy savings afterwards. I have acted in this complementary design role on large multidiscipline projects for more than 15 years (from Power Engineers onwards), it’s a soft, win-win process.

Thanks for offering the Opportunity
It is always a pleasure and privilege to work with City Staff.

Brian Formusa P.E. Mechanical Engineer

Subject: Hailey Community Climate Challenge – architecture and engineering services for LEED 2009 New Construction and Major Renovation Certification of the Interpretive Center

Dear Michael:

Ruscitto/Latham/Blanton Architectura P.A. has been selected to provide architecture and engineering services for LEED 2009 New Construction and Major Renovation Certification of the Interpretive Center as part of the Hailey Community Climate Challenge. Please review the following conditions of the award, sign this letter and return the original to the City of Hailey for Mayor Rick Davis’ signature. I will then send you a complete, signed copy for your records.

1. All services and fees detailed in the attached Services Agreement and Consultant Fee Schedule will apply.
2. All prerequisites listed in the attached Consultant Fee Schedule will be pursued.
3. Any credits listed in the attached Consultant Fee schedule may not be pursued, depending on material costs associated with the fee and any other information which affects the feasibility of achieving any credit. The determination on which credits will be pursued will be made by the City of Hailey. Invoicing of service fees listed for each credit in the attached Consultant Fee Schedule shall reflect the actual credits being pursued, as determined by the City of Hailey. Notification of this determination shall be made to Ruscitto/Latham/Blanton Architectura P.A. in writing (email communication is acceptable). In the event that the city chooses not to proceed with any LEED credit, which the city has previously notified RLB of in writing, any partial or completed work that has been conducted on any LEED credit will be invoiced in an amount that reflects the percentage complete.
4. The Service Fee will cover all necessary documentation for each LEED 2009 NC prerequisite and credit and will be submitted to the city in a timely manner.
5. In the event that it is determined that insufficient documentation for any prerequisite or credit is submitted to the city, Ruscitto/Latham/Blanton Architectura P.A. will supply the city with the required and corrected documentation in a timely manner, following notification to Ruscitto/Latham/Blanton Architectura P.A. from the city.
6. This agreement will remain in effect until the project receives final LEED Certification from United States Green Building Council (USGBC).
7. Ruscitto/Latham/Blanton Architectura P.A. and its selected consultants accept all terms, conditions, and provisions listed in the Green Building Certification Institute’s LEED Project Registration Agreement and LEED Project Certification Agreement.

Thank you very much for the thought and effort that have gone into your proposal for architecture and engineering services. The City of Hailey is grateful for your participation in the
Hailey Community Climate Challenge, and I look forward to working with you on the Interpretive Center.

Sincerely,

Mariel Platt
Sustainability Coordinator
City of Hailey

Rick Davis, Mayor          Date          Michael Bullis, AIA          Date
April 7, 2011

SERVICES AGREEMENT

Ruscitto/Latham/Blanton Architectura P.A. proposes to provide the following Services for the Interpretive Center component of the Hailey Rodeo Park located in Hailey, Idaho.

CLIENT INFORMATION:
Client: City of Hailey
Representative: Rick Davis, Mayor
Address: 115 S. Main Street, Hailey, Idaho 83333
Phone: 208.788.9815 ext. 24
Facsimile: 208.788.2924
Email: rick.davis@haileycityhall.org

PROJECT INFORMATION:
Project Name: Hailey Rodeo Park – Interpretive Center
Location: Hailey, Idaho

SERVICES:
The Services include calculations, documentation, and design to support and assist the City of Hailey in the LEED certification process. The project will pursue a target of USGBC LEED Certified rating.

SERVICES FEE:
See the attached Consultant Fee Schedule – LEED Certification
1. The Service Fee includes providing design information to the Integrated Design Lab (IDL) for use in the building energy model.
2. The Service Fee includes providing design information to be included in the Basis of Design (BOD) based on the Owner’s Project Requirements (OPR).
3. The Service Fee includes time required to coordinate with the Commissioning Agent (CxA) for Enhanced Commissioning – EA Credit 3.

SITE VISITS:
Site visits by the Mechanical Engineer (ES2) will be billed at $600.00 per visit as requested by the Client.

PAYMENT:
The Services Fee will be invoiced monthly based on completed LEED credit documentation received by the City of Hailey. Additional Services that are authorized by the Client are invoiced after completion on a monthly basis.

Thank you for the opportunity to propose Services on this project. We look forward to working with you. Please indicate your acceptance of this proposal by signing below and returning a copy. Please call me if you have any questions or concerns regarding this Agreement.

Accepted by Michael Bulls, AIA

Subject: Sawtooth Baseball Seasonal Park Permit

Dear Mayor and City Council:

Lars Hovey, who works for the School District as a High School Health/PE teacher and also runs the very popular and successful kids’ baseball program, has “adopted” the ballfield in Keefer Park for his Sawtooth Baseball programs.

Not only does Lars work directly with the kids in providing a much-needed active recreation program, he has volunteered many hours over the last three years in improvements and maintenance on the ballfield itself. Lars is responsible for getting donations for materials and labor to install a homerun fence; he has weeded, raked and improved the diamond dust infield; and, he has worked with Tom Hellen and myself all along the way to ensure that his efforts coincide with the city’s goals for the ballfield. The city and its children are the beneficiaries of Lars’ efforts with the ballfield and the programs that take place there.

Before the park was built and was merely in its visioning stage, we had always hoped that local recreation leagues or groups would “adopt” the ballfield and soccer field for their own. The Nelson Ballfields, the ballfield at Lions Park, Founders Field and the girls’ softball field at the high school all have been "adopted" and improved by the teams and coaches using them, and Lars Hovey and his teams are doing the same for the ballfield at Keefer Park.

This summer, because of Lars’ efforts to improve the field, there will be additional programming at the ballfield. Lars is applying for a “Seasonal Use Park Permit” which will alert the city to the times of his practices and games, and will reserve the field for Lars’ programs. The permit fee is $100 per season. I would ask the City Council and Mayor to waive that fee for at least this season because of Lars’ efforts in improving the ballfield and making it a valued recreation asset.

Thank you for your consideration, and thanks to Lars for his work on behalf of our children and our parks.

I would be happy to write the letter.
I will email Lars the permit form, let him know what we're doing, and then have him get the completed permit back to you.

Thank you VERY much.
Becki

Becki,

Do you want to write a letter of request on his behalf or do you think Tom would want to? After the letter is received I or Tom can create an Agenda Item Summary to get it to Council. We will want to do this in advance of the start of his season.

Thank you,
Trina Isaacs

How do we get on the agenda to waive the fees? Lars has done, and continues to do, a ton of maintenance and improvements to the ballfield, and it would be an insult to charge him a fee.

Thanks,
Becki

On 3/30/2011 8:12 AM, Trina Isaacs wrote:
Becky,

The seasonal use waiver fee would have to be requested to City Council and approved by them. As it is ordinance/resolution to charge the fees.
Hi, as you can see, Lars would like to reserve the ballfield that he has put so much work into for his baseball/kids programs. I thought the P&L Board had talked about this and had wanted to waive his $100 Seasonal Use Permit fee. I also went to the city's website to find the permit form, but it didn't look right; is the permit form on the website the updated form that we worked on last summer? Can't Lars' fee be waived as we are getting far more from him than we are giving him?

I told Lars I would work with him on behalf of the Hailey Parks Foundation. We'll see what he has in mind.

Thanks, let me know about the permit form and fee.

Hi Becki,

I, of course read your resignation article in the paper (sad for us!) but wanted to get your thoughts on proceedings at Keefer Park now that spring has (nearly) sprung. Maybe you could direct me to an "official contact" to run things through, much like we did back in the day. Here are a couple of items:

*Could I (Sawtooth Baseball) get another "official user" type of status for the field. I have continued plans for upgrades, etc., but as the field improves, so does the desire to play on it. I absolutely don't want "sole access" but would like priority when my programs are in full swing (starting next week!)
*Also, I would like to apply for a Pepsi grant (refresheverything.com) in a month or so and need to have a non-profit partner w/ the proper documentation. Is there someone you can think of from the Foundation who might work w/ me on this?

That's about it for now. I've contacted Ed Uhrig and we're making plans for the homerun fence completion. I'll keep you all abreast of the situation.
Thanks, and hope you're enjoying your retirement from public service!

Lars

Hi Lars,

I've talked to Trina Isaacs, who is in charge of park reservations and use, and here's the plan:

You need to fill out a permit form for a "Seasonal Use Park Permit", which will reserve the ballfield for your practices and games for this year. Normally the permit is $100, but we are asking the Mayor and Council to waive that fee for you, as we have greatly benefited from all your work on the field. I am writing a letter to the Council requesting the waiver (they always waive fees when requested), so there should not be a problem.

Here is the permit form to be completed and returned to Trina at City Hall: http://haileycityhall.org/publicworks/parks_trails/park_use_permit.pdf

Trina is at 788-9830, ext 22, or at trina.isaacs@haileycityhall.org if you have questions filling out the form.

I'll send in the letter separately, and Trina will get this on a Council Agenda as soon as possible and you should be in business (you do not need to go to the Council meeting, but you are most welcome to, if you'd like).

Best,
Becki
