Proposed amendment to establish wastewater rates for seasonal summer users

AUTHORITY: ☐ ID Code ________  ☐ IAR ________  ☐ City Ordinance/Code ________

(IF APPLICABLE)

BACKGROUND/SUMMARY OF ALTERNATIVES CONSIDERED:

At the last Council meeting, there was a discussion about wastewater rates for seasonal summer users. Hailey has adopted wastewater rates based solely on metered water. Under our new ordinance, water use is determined during the period between November 1 and March 31 of the following year. Staff has discovered that there are some summer users who do not consume any water during the winter. For these users, it has been difficult to establish an equitable metered wastewater rate. Staff suggests that we establish wastewater fees for summer seasonal users based on an average monthly amount during the prior season. The ordinance is designed to create an incentive to meter both irrigation and non-irrigation for large seasonal users. The ordinance also has some suggested word clarification. Please note that we are suggesting that the effective date of the ordinance is January 1, 2015. Delaying the effective date will allow larger seasonal users to plan for installation of a separate meter.

AN ORDINANCE OF THE CITY OF HAILEY, IDAHO, AMENDING TITLE 13 OF THE HAILEY MUNICIPAL CODE BY REPEALING SECTION 13.04.130(B)(2) AND REPLACING IT TO ESTABLISH NEW ACCOUNT AND SEASONAL WASTEWATER METERED FEES; BY PROVIDING FOR A REPEALER CLAUSE; BY PROVIDING FOR A SEVERABILITY CLAUSE; AND BY PROVIDING FOR THE EFFECTIVE DATE OF THIS ORDINANCE ON JANUARY 1, 2015 UPON PASSAGE, APPROVAL AND PUBLICATION ACCORDING TO LAW.

Proposed amendment to Chapter 5.04 (Liquor Sales and Regulations)

(IFAPPLICABLE)

BACKGROUND/SUMMARY OF ALTERNATIVES CONSIDERED:

At the last Council meeting, we discussed a revision to the liquor license chapter of the Hailey Municipal Code to eliminate the requirement of a sworn affidavit as part of the liquor license application process. Applicants have to submit a sworn affidavit to the State of Idaho and it seems duplicative to require a similar affidavit for a city license. The attached ordinance deletes the requirement of a sworn affidavit. In addition, I revised the penalty section of the ordinance. The present ordinance purports to make it a felony to submit a false statement as part of city application for a beer, wine or liquor license. Since municipalities only have authority to prohibit misdemeanors, I eliminated the felony provision and replaced it with a misdemeanor provision.

BACKGROUND/SUMMARY OF ALTERNATIVES CONSIDERED:

As you learned at the last Council meeting, there was a recent burglary of a business engaged in the sale of guns. Apparently, several weapons were stolen. The business had a private alarm system. The alarm was activated but local law enforcement was not contacted for a considerable time after the burglary. The Chief would like to ensure that any business selling guns shall have an alarm system connected to a public dispatch. Under that arrangement, local law enforcement can be notified immediately and therefore have an enhanced chance to apprehend any burglar. This amendment would revise the business license provisions to ensure such an alarm system.

AGENDA ITEM SUMMARY

DATE: 7-21-2014  DEPARTMENT: PW/CDD  DEPT. HEAD SIGNATURE: MA

SUBJECT: Public hearing on proposed amendments to Title 9 of the Hailey Municipal Code for the use of bows and arrows upon the issuance of a city permit.

AUTHORITY: □ IAR  □ City Ordinance/Code Zoning Ordinance No. 532 (IF APPLICABLE)

BACKGROUND/SUMMARY OF ALTERNATIVES CONSIDERED:

On July 1, 2014, the Parks and Lands Board approved a proposal for an educational archery range business to be conducted within the rodeo arena at Werhheimer Park. While the Parks and Lands Board was in favor of this use of the rodeo arena, Section 9.12.020 specifically prohibits the use of bows and arrows on public property. The proposed amendment allows for bows and arrows “upon the issuance of a park reservation permit and a finding from the Hailey Chief of Police that the use of a bow and arrow in a City Park is not a danger to persons or property.” The amendment further states that the person or entity shall comply with the “terms and conditions of the permit” as required by the Chief of Police.

FISCAL IMPACT / PROJECT FINANCIAL ANALYSIS:

ACKNOWLEDGEMENT BY OTHER AFFECTED CITY DEPARTMENTS: (IF APPLICABLE)

[Marked: City Administrator, City Attorney, City Clerk, Building, Engineer, Fire Dept., Library, Comm. Dev., Police, Public Works, Parks, P & Z Commission, Benefits Committee, Streets, Treasurer]

RECOMMENDATION FROM APPLICABLE DEPARTMENT HEAD:

IS ARCHERY A SAFE SPORT? YES!

WHAT RESEARCH REVEALS ABOUT THE SAFETY OF ARCHERY

Archery has been part of countless physical education introductory programs in schools, summer camps, Scouts, 4-H Clubs and community recreational programs, to name a few. Throughout its long history in recreational sports, archery ranks as one of the safest activities offered in any organized group setting. Especially impressive is the fact that archery maintains a consistently high safety record despite the fact that participants range from grade school children to senior citizens, many of whom have never before picked up a bow and arrow.

Archery has become increasingly popular in recent years as schools and recreational programs strive to find activities that appeal to families, both genders, and all age groups in a variety of group settings. Educators, group leaders and recreation instructors find archery is safe and easily learned. Beginners become proficient with minimal assistance, and they improve their skills quickly with practice.

As more administrators at schools, camps, clubs and recreational programs consider adding an archery program, safety questions often arise. This report addresses those concerns, and also compares archery's safety record with the safety record of many recreational activities that regularly draw more experienced participants.

"We implemented archery in schools across Kentucky in 2002, and because we emphasized safety with our students, conducted training for all teachers, and adhered to standard procedures, we have had a remarkable safety record. Vigilant school districts are always concerned about liability issues, especially with sports and recreational activities, and archery consistently proves itself one of the safest sports taught in our public schools' physical education programs."

COMPARISON OF SPORTS PARTICIPATION AND INJURY RATES

The U.S. Consumer Product Safety Commission (CPSC) operates the National Electronic Injury Surveillance System (NEISS), which is a database used to track hospital injuries for more than 15,000 kinds of consumer products used in sports and recreational activities in and around homes and schools. Data from the NEISS are a critical resource for consumer groups, manufacturing and industry organizations, the media, educators, researchers and attorneys. The data are also used by the Centers for Disease Control and Prevention which is one of the 13 major operating components of the Department of Health and Human Services, the principal agency in the United States government for protecting the health and safety of Americans. Organizations like the National Safety Council, a nonprofit, nongovernmental, international service organization also use the data from NEISS to compile its annual Injury Facts publication.

We queried the NEISS database to determine the safety of archery compared to other sports. We compared this information to the data on participation obtained from Sporting Goods Manufacturers Association (SGMA), a global trade association of manufacturers, retailers and marketers in the sports products industry. The SGMA provides estimates of the number of participants in a number of sports and recreational activities, including archery, through an annual survey conducted for them by American Sports Data, Inc. Since SGMA only tracks participation for ages 6 and above, we queried the NEISS database for safety data for several sports beginning at age 6.

These data indicate that archery is one of the safest sports, with an injury rate of less than one incident per 1,000 participants, in 2004 (Table 1). Recreational activities like golf and fishing have an injury rate of up to 1.5 to 2 times the rate for archery (Figure 1). Common sports like soccer, baseball and basketball have injury rates 15 to 25 times that of archery (Figure 1). Because the National Safety Council cautions about calculating injury rates from these data, we presented the raw injury and participation numbers in the Sports Participation and Injury Table (Table 1) so you can judge for yourself.

Figure 1. Injury rates per 1000 participants in youth sports from 2000 through 2004.
“Archery is probably the safest thing we've done in our phys-ed classes. Not one person has been sent to the office for an injury. For most activities, we send down at least one student a day for a turned ankle, jammed finger or an elbow to the face. With archery, no one has ever been hurt. When you're playing football or basketball, and dealing with large and small kids or eighth-graders playing with sixth-graders, kids get hurt when running over each other. Archery is an individual sport, so you don't worry about someone's aggressive behavior.”

<sup>a</sup> These data are from the National Electronic Injury Surveillance System and represent the hospitals which actually record the information.

<sup>b</sup> These data are from National Electronic Injury Surveillance System and represent estimated nationwide injuries based on samples.

<sup>c</sup> These data are from the Sporting Good Manufacturers Association international for ages 6 and older who have participated at least once per year.

<sup>d</sup> This rate was calculated by dividing the number of estimated cases by the number of participants and multiplied by 1000. The National Safety Council discourages this calculation because the frequency and duration of participation of each sport is not known.
SAFETY RATINGS FROM THE INSURANCE INDUSTRY

The safe record of archery is also recognized by the insurance industry. Based on evidence from injury reports, the standard general liability coverage maintained by most organizations has been determined sufficient for archery. In these situations, no additional policy amendments are needed when adding an archery program.

Insurance broker Francis L. Dean & Associates rates archery in the same class as badminton, bowling, cross country, fencing, golf, handball, rowing, tennis and track when calculating policy premiums. Among the sports that require the highest insurance premiums for coverage by Francis L. Dean & Associates are basketball, cheerleading and volleyball.

Archery Shooting Procedure

Beginning archers are taught to respond to whistle commands, much like other sporting activities. Participants are trained to move between stages in shooting by one, two or three whistle commands. In most situations, participants are placed into small groups to share equipment and so each individual can enjoy shooting safely.

Because of the highly organized and sequential nature of archery, the participants are never running, jumping, engaging in physical contact or trying to coordinate their physical activities as a team. Individuals, regardless of physical capabilities, sex, and age all participate on the same playing field and all respond to the same commands.

Archery teachers/instructors should be certified. For more information on certification go to www.archerysearch.com or call 866-266-2776. Certification programs are scheduled to be sure every instructor is prepared to teach archery in schools, camps, recreation programs and other organizations or group activities.

The progression in archery is to:

1. Start at the waiting line.
2. Proceed upon hearing two whistles to the shooting line.
3. One whistle is blown to indicate that shooting can begin in a sequence of steps.
4. Each step of the shooting sequence is triggered by a command from the instructor.
5. When each archer has shot their arrows and the range is clear, three whistles allow the archers to set their equipment aside.
6. After three whistles, the archers proceed to the target line, and score their arrows.

"The archery training our teachers received was so complete and well done that they were confident in their ability to teach it to students. Much of that’s because of the emphasis on safety. Each student can be easily monitored to determine their effort, skills, technique and safe conduct. Teachers can address each student and provide individual feedback. The safety whistle codes make sense to students, and the good equipment and standardized training encourage safe participation."

Sportscover®, an international insurance company that specializes in coverage for sporting activities, has developed a youth injury calculator that factors in age, sex, and fitness level for many sports. This calculator uses participation and injury data to estimate the potential probability of injury for individuals in specified age, sex and fitness categories. Sportscover is one of the world’s leading sports insurance underwriters with over one million active sporting clients including players, administrators, coaches and officials.

For all ages, both sexes and for both unfit and fit participants, only fishing had fewer injuries than archery when analyzing 14 sporting activities (Table 2). The injury rates estimated for girls were about 80 percent of the rates for boys for all sports and across all age groupings. In addition, injury rates for unfit participants were about twice the injury rates for fit participants. Injury rates for archery averaged 5 to 20 times lower than for all other sporting activities including badminton, tennis, soccer and golf.

Table 2. Sportscover’s estimates on how likely you are to be injured within a 12 month period. The values shown are for unfit individuals. Youths rated as fit are injured half as often as unfit participants and that trend holds for all ages and sports.

"Every kid learns something in archery, because those who dominate everyday physical education activities do not always dominate archery. Other kids get to feel what it's like to be the best at something, to feel like a superstar. It also teaches them about safety, and how unsafe habits can cause injury to them or to those around them. When this idea was first pitched to me I was a big skeptic. But after doing it for a year and taking a group to a contest, I'm a big fan."

SPORTS INJURIES FOR SENIOR CITIZENS

Archery's safety record also stands out when analyzing sports-related injuries of senior citizens. In 1996, the U.S. Consumer Product Safety Commission released a report on sports-related injuries for people ages 65 and older. The report lists the 13 sports and activities with the highest number of reported injuries, and archery did not make the list.

Table 3. Estimated sports-related injuries to persons 65 years or older for 1996. The list includes sports with 500 or more reported cases. NOTE: ARCHERY WAS NOT LISTED.

"Target archery is one of the safest sports for kids because the discipline involved teaches participants to be safe while having fun. My international experience with Olympic youth development programs has convinced me that certifying instructors—just like any other major recreational sport—is the key to everyone enjoying an archery shooting experience. We were so impressed with the discipline and responsibility taught as a part of archery that my entire family has been involved in the Chicagoland Junior Olympic Program for many years."
Mark Miller, Past President
USA Archery/International Archery Junior Development Chair, Naperville, Illinois

"Once people see how our archery class is conducted, they see it's very safe. Unlike most sports, archery offers a controlled environment. In comparison, when you put a ball in the air and get kids running, jumping and spinning around, almost anything can happen. You expect injuries, whether it’s turned ankles, twisted knees or torn ligaments. It doesn’t matter if you’re talking about softball, badminton, football or basketball. Archery allows us to teach kids a safe, lifetime skill they can practice almost anywhere."

"I have been involved in youth archery programs since 1973 and have never had nor heard of any serious archery accident or injury. The most serious incidents we have had are string burns from kids who did not use arm guards or where an instructor simply failed to watch a new shooter closely...Where good, qualified adults are mixed with motivated kids who are willing and desiring to learn under sound standards of safety and range protocol, archery is extremely safe."
