thereof. Provide to the State a copy of the Contract Proposal form. Notice to
Contractors and approved construction plans.

4. Prepare a contract estimate of cost and award a contract for construction of the
project based on the successful low bid.

5. Designate an engineer in responsible charge and other personnel, as the City
deems necessary, to supervise and inspect construction of the project in
accordance with the plans, specifications and estimates in the manner required by
applicable state and federal regulations. This engineer, or his authorized
representatives, will prepare all monthly and final contract estimates, progress
estimates and change orders.

6. Cause to be replaced to original, equal or better condition any existing sidewalks,
curb and gutter, pavement, regulatory signs, and sewer facilities, except as herein
stated as obligations of the State.

7. Upon request to energize, assume all energy costs required to operate the traffic

14. Obtain concurrence from the State before accepting any new street or alley right-of-way connecting to the state highways within the project limits.

15. Upon substantial completion of the work and before payment to the contractor, notify the State and provide the opportunity for inspection by the State of the completed project.

16. Maintain record of all costs incurred on the project. If requested by the State, provide records showing how the $212,020 was expended on the project and reimburse the State for any funds not utilized for costs associated with construction of the signal.

17. Indemnify, save harmless and defend regardless of outcome the State from expenses of and against suits, actions, claims, or losses of every kind, nature and description, including costs, expenses and attorney fees that may be incurred by reason of any negligent act or omission of the City in the construction and maintenance of the work.

SECTION III All parties agree that:

1. The traffic signal installation will not be altered or abandoned without the prior concurrence of both parties.
2. Should any of the traffic signal installation be damaged or destroyed through the wrongful or negligent act of any third party, the City and its agents will make every effort to determine the identity and whereabouts of the responsible party, and the State will attempt collection of the cost of repair or replacement. The Parties will share the costs of repair or replacement based on the share of approach legs if:

(a) Collection cannot be accomplished after reasonable attempt, or
(b) The damage or destruction was not caused by the wrongful or negligent act of a third party.

3. The parties agree to advance funds for the repair or replacement based on the share of approach legs. If the State is able to collect the cost of repair or replacement from the responsible party, it shall reimburse the City the advanced funds.

4. Sufficient Appropriation. It is understood and agreed that the State is a governmental agency, and this Agreement shall in no way be construed so as to bind or obligate the State beyond the term of any particular appropriation of funds by the State Legislature as may exist from time to time. The State reserves the right to terminate this Agreement if, in its sole judgment, the legislature of the State of Idaho fails, neglects or refuses to appropriate sufficient funds as may be required for the State to continue payments. Any such termination shall take effect immediately upon notice and be otherwise effective as provided in this Agreement.

5. This Agreement shall become effective on the first date mentioned above and shall remain in full force and effect until amended or replaced upon the mutual consent of the City and State.
EXECUTION

This Agreement is executed for the State by its District Engineer, and executed for the City by the Mayor, attested to by the City Clerk, with the imprinted corporate seal of the City of Hailey.
