Proposed By: Carl Hjelm

#	Item	Description	Cost
1	Box Elder	Pruning - Tree Work - Wood River Division Extensively prune two large box elder trees in the right of way in front of the residence. The objective is to aggressively clean and thin the trees, and attempt to improve their structure as much as possible. As is known, the trees have been topped more than once in their lives, and a significant amount of internal limb decay appears to be present. The work will take all day, and we would need the cars beneath the trees moved, and the trailer just to the north of the trees moved. alternatively, we could remove the trees for that price. Stump grinding would be extra. Removal may be warranted. The internal decay of the topped limbs appears to be advancing, and within the last two years the trees have seen several large limb breakouts. The last one, occurring approximately two weeks ago, damaged an antique truck. The trees are borderline hazardous.	\$4,800.00
Total:			\$4,800.00
