

## CONSTRUCTION WASTE MANAGEMENT PLAN

**Required for all residential and commercial construction job sites in Hailey.**

Project Contact: \_\_\_\_\_ Permit #: \_\_\_\_\_

Address of Site: \_\_\_\_\_

Phone #: \_\_\_\_\_ Email: \_\_\_\_\_

Construction waste makes up approximately 16% of the waste sent to our landfill. Of the estimated 5,666 tons of construction waste that is generated and sent to our landfill each year, ***the following materials are required to be recycled: clean waste wood, cardboard and metal.*** In addition to waste receptacles, bins for recycling cardboard, metal and clean wood waste shall be provided, and sorted accordingly on site during construction and will be verified by the program administrators during regular inspections. It is encouraged to recycle or reuse additional construction waste when possible.

Type of Material	Quantity (Weight)	Method of Recycling	Handling Procedure
Clean Wood Waste		Keep separate for reuse on site. If not reused on site, deliver it to Ohio Gulch for composting.	Describe the container and method used for keeping this material separated in a designated area. Attach a site plan*.
Cardboard		Dumpsters can be picked up by Clear Creek and taken for recycling. <b>Do not dispose of cardboard at the Hailey Park &amp; Ride Recycling Center.</b>	
Metals		Dumpsters can be picked up by Clear Creek and taken for recycling.	
<i>Optional:</i>			
Concrete		Recycle when possible.	
Plastic Film		Collect on site and deliver to Ohio Gulch for recycling.	
Plastic Containers		Dumpsters can be picked up by Clear Creek and taken for recycling.	
Drywall		Reuse or landfill.	

### RECYCLE LOCATIONS AND RESOURCES FOR FURTHER INFORMATION:

**Southern Idaho Solid Waste**
