

- Do not walk or drive through flood waters. A car can easily be carried away in just two feet of water, and 6 inches of moving water can knock you off your feet! Do not attempt to drive or wade through deep pockets of water or running washes. Unstable banks should be avoided.
- Develop an evacuation plan for your family.
- Avoid low-lying areas. Seek shelter in the highest areas possible.

What should you do after a flood?

- Listen to the radio for emergency instructions.
- Avoid driving if possible.

2017 Flooding in Hailey

- Follow established permitting procedures for property damage repairs:
 - Select a contractor who is licensed in his trade.
 - Require your contractor to obtain the proper permits for work being performed. Permits are required for any permanent improvement (including roofing, siding, additions, alterations, etc.) to a structure and for site work such as grading, filling, etc.
- Questions about permits or contractor licensing may be addressed to the City of Hailey Building Department at (208) 788-9815 x27.

➤ **Recognize the natural and beneficial functions of floodplains to help reduce flooding:** Floodplains are a natural component of the environment. Understanding and protecting the natural functions of floodplains helps reduce flood damage and protect resources. When flooding spreads out across the floodplain, its energy is dissipated, which results in lower flood flows downstream, reduced erosion of the streambank and channel, deposition of sediments higher in the watershed and improved groundwater recharge. Floodplains are scenic, valued wildlife habitat, and suitable for farming. Don't pour oil, grease, pesticides or other pollutants down storm drains or into ditches or streams, so that they and the habitat they provide can continue to serve their beneficial functions.

 NFIP: 1-888-FLOOD29

This information is provided by the City of Hailey and is applicable to properties within the limits of the City. If you reside in a jurisdiction other than the City of Hailey, contact your regulatory authority for information. Please contact the City Floodplain Administrator with questions at (208) 788-9815 x13 or via U.S. mail.

2017 Flooding in Hailey

ARE YOU PREPARED FOR A FLOOD IN YOUR NEIGHBORHOOD?

MANY AREAS IN HAILEY ARE IN OR NEAR A SPECIAL FLOOD HAZARD AREA.

History of Flooding in the City of Hailey. The City is susceptible to flooding associated with spring runoff of the Big Wood River, and with sheet flooding during unusual weather events.

2017 Flooding in Hailey

Each year as the water rises during the spring there is a potential for flooding in many areas including the Della View Subdivision area near Heagle Park, as was seen in 2006 and 2017. Quingley Creek experienced flashfloods event associated with heavy rain on frozen ground during the winters of 1963 and, more recently, in 2018.

Did you know?

In a high-risk area, your home is more likely to be damaged by flood than by fire. Floods are the #1 natural disaster in the United States.

What is considered a flood?

- A Flood is a general and temporary condition of partial or complete inundation of 2 or more acres of normally dry land area or of 2 or more properties from:
 - *Overflow of inland waters; or*
 - *Unusual and rapid accumulation or runoff of surface waters from any source; or*
 - *Mudflow*

What should you do before a flood?

- **Determine if your property is located in an area subject to flooding.** The following areas have a known potential for flooding in the City of Hailey:

Della View — **Cedar Bend**
Birdwood — **Broadford Estates**

This is not a complete list of areas that are within flood zones, but rather a list of areas with documented flooding problems. If your neighborhood is not listed, your property may still be within a flood zone, as designated by Federal Emergency Management Agency (FEMA) maps. Upon request, the Floodplain Administrator at (208) 788-9815 x13, will make free flood zone determinations for properties within the City. The building department maintains elevation certificates for many properties within the city which are also available for review.

- **Purchase flood insurance on your property.**

Flooding is not covered by a standard homeowner's insurance policy and must be purchased through a separate flood insurance policy. Coverage is available for the building itself as well as for the contents of the building. The City of Hailey participates in the National Flood Insurance Program (NFIP) which allows all homeowners, whether in a floodplain or not, to purchase federally backed flood insurance for all structures. Note that there is a 30-day waiting period before coverage goes into effect. More than 25 percent of NFIP claims are filed by properties located outside the floodplain, also known as the Special Flood Hazard Area (SFHA). Contact your insurance agency

for more information and visit floodsmart.gov, the official site of the NFIP.

- **Maintain drainage channels and pipes free of obstruction and debris.** The City of Hailey

performs cleaning and maintenance activities on the drainage channels and pipes in City easements & rights-of-way in accordance with an established schedule and other standard operating procedures. Residents are encouraged to assist in maintaining the drainage in their areas by removing or reporting obstructions (such as shopping carts, leaves, debris, trash, etc.). Keeping drainage channels free of obstructions reduces flooding in the event of heavy rains. By way of City ordinance, it is illegal to dump trash, leaves, landscape debris, paint, grease, or any other material into any portion of the City's drainage system. Such dumping can have devastating impacts on water quality in addition to causing flooding. To report obstructions or illegal dumping, or for questions regarding drainage system maintenance, please contact the Public Works Department at (208) 788-9830 x17.

- **Protect your property from the hazards of flooding and wind.** Various methods may be used to minimize flooding. If the floor level of your property is lower than the "Base Flood Elevation" (elevation of the 100-year flood, based on the FEMA maps),

consider elevating your structure to the Flood Protection Elevation, if possible. Brochures discussing flood proofing and other mitigation measures are available in Hailey City Hall and Hailey Public Library. If a flood is imminent, property can be protected by sandbagging areas subject to the entry of water into living spaces. The City of Hailey will make site visits to provide one-on-one advice to a property owner regarding flooding and drainage issues on private property. We also have site specific information for some parcels within Hailey. For more information, please contact the Community Development Department at (208) 788-9815 x13.

- **Meet improvement requirements.** The National Flood Insurance Program (NFIP) requires that if the cost of reconstruction, additions, or other improvements to a building equals or exceeds 50% of the building's market value, then the building must meet the same construction requirements as a new building. Substantially damaged buildings must also

be brought up to the same standards. For example, a residence damaged so that the cost of repairs equals or exceeds 50% of the building's value before it was damaged must be elevated to the Flood Protection Elevation (2 feet above the base flood elevation). Please contact the Building Department at (208) 788-9815 x27 for more information.

- **Meet permitting requirements.** All development within the SFHA requires a Floodplain Development Permit in addition to any required building permit. Always check and fulfill permitting requirements with the Building Department at (208) 788-9815 x27 and/or the Floodplain Administrator at (208) 788-9815 x13 before you build on, alter, fill, or re-grade on any portion of your property and/or within any easement or right-of-way. Also, contact either of the numbers above to report any suspected permitting violations.

- **Keep an emergency supply.**

Non-perishable food, water, batteries, flashlights, a manual can opener, and a battery-operated radio should be kept available.

What should you do during a flood?

- If your property is in imminent danger of flooding, please contact Idaho Power at (800) 488-6151 and/or Intermountain Gas at (877) 777-7474 to request that your power and natural gas be shut off, or for guidance on how to do it yourself. Call either organization regarding any other electrical or natural gas emergencies.

- Move all valuables, furniture, and HVAC equipment to higher areas of the dwelling to minimize damages.

- Visit www.blaineemergency.org or tune-in to local commercial radio or television stations (KECH – 95.3 FM or KSKI – 94.5 FM), or NOAA Weather Radio (frequency 162.450) for Watch and Warning Bulletins and any corresponding emergency instructions. If evacuations are called for, it is imperative that you follow instructions in the time frame noted.
