What is considered a flood?
- A Flood is a general and temporary condition of partial or complete inundation of 2 or more acres of normally dry land area or of 2 or more properties from:
  - Overflow of inland waters; or
  - Unusual and rapid accumulation or runoff of surface waters from any source; or
  - Mudflow

What should you do before a flood?
- Determine if your property is located in an area subject to flooding. The following areas have a known potential for flooding in the City of Hailey:
  - Delta View
  - Cedar Bend
  - Broadford Estates
This is not a complete list of areas that are within flood zones, but rather a list of areas with documented flooding problems. If your neighborhood is not listed, your property may still be within a flood zone, as designated by Federal Emergency Management Agency (FEMA) maps. Upon request, the Floodplain Administrator at (208) 788-9815 x13, will make free flood zone determinations for properties within the City. The building department maintains elevation certificates for many properties within the city which are also available for review.

- Purchase flood insurance on your property. Flooding is not covered by a standard homeowner's insurance policy and must be purchased through a separate flood insurance policy. Coverage is available for the building itself as well as for the contents of the building. The City of Hailey participates in the National Flood Insurance Program (NFIP) which allows all homeowners, whether in a floodplain or not, to purchase federally backed flood insurance for all structures. Note that there is a 30-day waiting period before coverage goes into effect. More than 25 percent of NFIP claims are filed by properties located outside the floodplain, also known as the Special Flood Hazard Area (SFHA). Contact your insurance agency for more information and visit floodsmart.gov, the official site of the NFIP.

- Maintain drainage channels and pipes free of obstruction and debris. The City of Hailey performs cleaning and maintenance activities on the drainage channels and pipes in City easements & rights-of-way in accordance with an established schedule and other standard operating procedures. Residents are encouraged to assist in maintaining the drainage in their areas by removing or reporting obstructions (such as shopping carts, leaves, debris, trash, etc.). Keeping drainage channels free of obstructions reduces flooding in the event of heavy rains. By way of City ordinance, it is illegal to dump trash, leaves, landscape debris, paint, grease, or any other material into any portion of the City's drainage system. Such dumping can have devastating impacts on water quality in addition to causing flooding. To report obstructions or illegal dumping, or for questions regarding drainage system maintenance, please contact the Public Works Department at (208) 788-9830 x17.

- Protect your property from the hazards of flooding and wind. Various methods may be used to minimize flooding. If the floor level of your property is lower than the “Base Flood Elevation” (elevation of the 100-year flood, based on the FEMA maps), consider elevating your structure to the Flood Protection Elevation, if possible. Brochures discussing flood proofing and other mitigation measures are available in Hailey City Hall and Hailey Public Library. If a flood is imminent, property can be protected by sandbagging areas subject to the entry of water into living spaces. The City of Hailey will make site visits to provide one-on-one advice to a property owner regarding flooding and drainage issues on private property. We also have site-specific information for some parcels within Hailey. For more information, please contact the Community Development Department at (208) 788-9815 x13.

- Meet improvement requirements. The National Flood Insurance Program (NFIP) requires that if the cost of reconstruction, additions, or other improvements to a building equals or exceeds 50% of the building's market value, then the building must meet the same construction requirements as a new building. Substantially damaged buildings must also be brought up to the same standards. For example, a residence damaged so that the cost of repairs equals or exceeds 50% of the building's value before it was damaged must be elevated to the Flood Protection Elevation (2 feet above the base flood elevation). Please contact the Building Department at (208) 788-9815 x27 for more information.

- Meet permitting requirements. All development within the SFHA requires a Floodplain Development Permit in addition to any required building permit. Always check and fulfill permitting requirements with the Building Department at (208) 788-9815 x17 and/or the Floodplain Administrator at (208) 788-9815 x13 before you build on, alter, fill, or re-grade on any portion of your property and/or within any easement or right-of-way. Also, contact either of the numbers above to report any suspected permitting violations.

- Keep an emergency supply. Non-perishable food, water, batteries, flashlights, a manual can opener, and a battery-operated radio should be kept available.

What should you do during a flood?
- If your property is in imminent danger of flooding, please contact Idaho Power at (800) 488-6151 and/or Intermountain Gas at (877) 777-7474 to request that your power and natural gas be shut off, or for guidance on how to do it yourself. Call either organization regarding any other electrical or natural gas emergencies.

- Move all valuables, furniture, and HVAC equipment to higher areas of the dwelling to minimize damages.

- Visit www.blainemergency.org or tune-in to local commercial radio or television stations (KECH – 95.3 FM or KSKJ – 94.5 FM), or NCAA Weather Radio (frequency 162.450) for Watch and Warning Bulletins and any corresponding emergency instructions. If evacuations are called for, it is imperative that you follow instructions in the time frame noted.
