NOTES

1. All Backflow devices must be certified by USC Engineering Center and on the Approved List.
2. Proposed devices must be tested prior to and after installation by an Idaho certified backflow device tester or suitable fire system professional.
3. All services shall conform to the vertical and horizontal separation requirements per DEQ.
4. Check valves shall be U.S.C. approved devices.
5. Blow-Off must be downstream of backflow device.
6. This device is only for protection for backsiphonage applications in both low health and high health hazard conditions.
7. This device must be installed 12" above any down stream pressurized component in the system.
8. See Standard Drawing 18.14.010.b.11 for layout location.
