“Exhibit A”

Enterprise Funds Connection and User Fees

Connection Fees

Connection fees are calculated based on the value of the system infrastructure divided by the system capacity. Connection fee calculations are shown on the attached exhibits and the following rates for a standard ¼" equivalent service are proposed:

Division	Current	Proposed	Cost Change
Wastewater	\$3,738	\$3,738	\$0
Potable Water	\$5,591	\$5,591	\$0

Wastewater User Fees

The Wastewater User fee is intended to cover all costs for the operation and maintenance of the municipal system. The fee is based on the amount of potable water used by a property between the months of November and March, with greater potable water demand resulting in a proportionately higher Wastewater user fee. Costs of operation have increased. Additionally, in order to maintain "bond compliance", user fee revenues must exceed non-capital expenditures by 25%. The following is proposed to be applied across the existing rate table:

Fee	Current	Proposed	Cost Increase
Wastewater User Fee	\$15.56	\$17.03	\$1.47

Wastewater Bond Fees

The 2014 Bond Repayment Fee for the existing Biosolids infrastructure has, since 2014, been included within the Wastewater User Fee. Going forward Staff recommends, as a best practice, to identify the new 2023 Aging Infrastructure Headworks Bond fee as a separate line on user bills. However, no change is proposed at the current time and the "built in" fee remains the same at \$13.63.

The new Headworks Bond Repayment Fee is itemized on the bill and remains the same at \$7.21.

Water User Fees

The Water User fees are intended to cover all costs for the operation and maintenance of the municipal system. These fees are primarily made up of 3 components:

- 1) Base Water Fee. The base water fee is intended to cover the fixed costs of the operation, maintenance and expansion of the municipal water system generally attributable to indoor potable water usage, which shall be twenty five percent (25%) of the water department budget. Generally speaking, as the budget increases this fee should increase, but it is typically offset by additional users adding to the system.

	Current	Proposed	Cost Increase
Base Water Fee	\$9.22	\$10.03	\$0.81

- 2) Metered Water Fee. The metered water fee is intended to cover the variable costs of the operation, maintenance, and expansion of the municipal water system, generally attributable to outdoor irrigation water usage, which shall be seventy five percent (75%) of the water department budget. Most of our municipal water use occurs during the summer. The City charges for water usage each month. Your water meter counts the gallons used, and the City charges for the amount of water used since the last meter read. Usage is rounded down, not up, to the nearest 1,000 for billing. If you used 1,001 or 1,999 gallons of water in a month, your bill would be for 1,000 gallons.

Metered Rate Categories

Hailey rate categories follow a very steep curve. The lowest water users (under 10,000 gallons per month) pay significantly less per gallon in this user tier than the price per 1,000 gallons for users ending in the higher tiers.

Any reduction in system use via water conservation methods, conversion of existing potable water demand to other water sources (surface/ground), higher precipitation years resulting in less irrigation demand, or reduction in other metered user fees will cause this fee to increase during the next assessment. The following increase is proposed to be applied across the existing rate table:

Proposed Metered Rate Table		Prior Year Rate	Metered \$ Difference
Gallons Used	\$/1,000 gallons		
1,000-10,000	\$ 0.64	\$ 0.51	\$ 0.13

151,000 & above	\$ 7.88	\$ 7.38	\$ 0.50

- 3) Bond Payment Fee. The monthly bond payment is intended to cover the cost of bond and note retirement costs which are the legal indebtedness the city is obligated to retire on a set schedule. The bond rate is decreasing due to decreased debt, and an

Increase in users, which spreads the remaining debt over the increased user base.
